

Information/Data Scraping Plan

Zahra Ashktorab

January 26, 2014

1 Introduction

Information Scraping: Find where are we getting data from + begin to setup infrastructure, social media, journals and publications, traditional media data scraping

2 Social Media

Twitter scraping: <https://dev.twitter.com/docs/streaming-apis>

Create list of authors in a field follow their posts

Facebook scraping: <https://developers.facebook.com/docs/plugins/recommendations>

3 Journals and publications

Google scholar API: <http://www.icir.org/christian/scholar.html>

4 Traditional Media data:

ABC news API: <https://developer.abc.com/docs/read/resources/APIparameters>

MSNBCnewsAPI : <http://www.nbcnews.com/id/34622365>
